PROFESSIONAL SUMMARY

Motivated Software Developer with hands-on experience building modern web applications using React, Next.js, JavaScript, Firebase, Tailwind CSS and REST APIs. Skilled in developing responsive user interfaces, authentication systems, dashboards, database-driven applications and practical e-commerce and service platforms. Strong debugging and problem-solving ability, with experience using Git/GitHub and VS Code. Interested in software development, full-stack web applications and remote opportunities where strong technical learning and reliable delivery are valued.

TECHNICAL SKILLS

Frontend	React, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design
Backend / Services	Firebase Authentication, Firestore, REST APIs
Development	Git, GitHub, VS Code, Debugging, Error Handling, API Integration
Programming	JavaScript, TypeScript fundamentals, React JSX/TSX
Other	Authentication, Protected Routes, Dashboards, CRUD Applications, Local Storage

SELECTED PROJECT EXPERIENCE

Apply Abroad / Zeckglobal — React & Firebase Web Platform

- Designed and developed a platform concept for users exploring study opportunities abroad. Implemented React-based pages, Firebase Authentication, Firestore integration, protected admin access, country/scholarship/school management concepts and user application workflows.

Developer Portfolio — React / Vite / Tailwind CSS

- Built a responsive personal portfolio showcasing software projects, technical skills and services. Implemented reusable React components, modern navigation, mobile responsiveness, project sections, social links, WhatsApp contact integration and CV download functionality.

Food Delivery Web Application — React

- Developed a practical food-ordering interface with menu browsing, shopping cart functionality, local storage persistence, drawer interactions, notifications and a payment-flow prototype.

Movie Discovery Application — React / Next.js

- Built movie-search experiences using API integration, reusable components and state management. Worked with authentication, favorites and responsive interfaces while troubleshooting frontend issues.

Other Software Projects

- Developed and experimented with authenticated dashboards, service platforms, business-management concepts and API-driven web applications, strengthening practical full-stack development and debugging skills.

EDUCATION

Bachelor of Science in Computer Science — Maasai Mara University

2019 – 2023

PROFESSIONAL DEVELOPMENT

- Online software development training and practical project-based learning through Udemy and independent development.
- Continuous hands-on learning in React, Next.js, Firebase, APIs, Git/GitHub and modern frontend development.

CORE STRENGTHS

Problem Solving • Debugging & Error Handling • Continuous Learning • Responsive Web Development • Independent Project Delivery • Communication • Adaptability

CAREER OBJECTIVE

To contribute to a professional software development team where I can build reliable digital products, apply my practical web-development skills, learn from experienced engineers and grow toward a strong full-stack software engineering career.
